

## PROJECT

### JACK UP – FLARE BOOM REFURBISHMENT PROJECT

#### BACKGROUND

The Client wanted to refurb 2 Nos of 60 ft flare booms on their jack up rig on urgent priority as part of their contract preparation. Both these flare booms were not serviced for the past 6 years and were in poor condition. The task was to be completed in 4 weeks and this was a challenge considering the comprehensive scope of work and condition of the flare boom.

#### EXECUTION

CCPL took up the challenge and completed the refurbishment project successfully to the satisfaction of the client in less than 4 weeks. See scope as per below –

- Complete Dismantling.
- Grit Blasting to SA2.5.
- NDT of all joints.
- Steel renewals as required.
- Piping and Piping Supports Renewals as required.
- Valves refurb.
- Spray Nozzle cleaning.
- Padeye renewals.
- All Fasteners renewals.
- Painting of Structure as well as Pipelines.
- Ignition system refurb was taken up by Client themselves and support was provided for the same.
- Final Assembly.
